## Industrial engineering

Including management engineering and management science

Class here works on the solving of management problems concerned with design, improvement, and installation of complex industrial systems of men, materials, and equipment; employing the methods of operations research and engineering analysis and design, with stress on optimum use of resources. For applications in special fields, see the field

For works on the organization and operation of industrial institutions and business enterprises see HD28+

For wage and salary administration see HD4909+

For labor relations see HD6958.5+

For industrial psychology see HF5548.7+

For personnel management see HF5549+

For industrial safety see T55+

For engineering economy see TA177.4+

For production management see TS155+

### Water supply for domestic and industrial purposes

Class here works on the supplying of usable water to consumers, including works on the water-supply systems and available resources of specific localities and works dealing with both water supply and sewerage

For water supply in specific industries, see the industry, e.g. TS1116.2 Paper industry

For works describing the hydrology of a region without regard to development see GB651+

For water supply and public health see RA591+

For general works on water-supply engineering (including the design and construction of works to procure water), as well as works on the development of the water resources of a watershed see TC401+

For rural water supply see TD927

## Applied photography

Class here techniques for taking and using photographs in special fields

Collections of photographs in special fields are normally classed with the field, e.g., pictorial works in natural history in QH46 views of modern Greece in DF719 pictorial works on North American Indians in E77.5

For collections of artistic photographs, however, or collections where the artistic intent is more overriding than the actual subject content see TR640+

Periodicals, exhibitions, dictionaries, etc.
