History of printmaking

Including collections of prints in book form and works on wood and metal engraving treated jointly
 Here are included engravings (and facsimiles) noteworthy for their age, method of execution, or artistic excellence, but not works in which the process of reproduction is secondary in interest to the works of art thus represented

For engravings of masterpieces of painting, see ND, unless the works are by very notable engravers, in which case prefer NE501+

For engravings of drawings, outline sketches, caricatures, etc., by famous artists (one or several), see NC

Certain subjects are to be classed independently of the method of reproduction. For example, see N7720 for Dance of Death; see NE218+ for portraits

For Catalogues raisonnés see NE90
